The flexible thermocouple extensions illustrated below are constructed using thermocouple wire or thermocouple extension wire. They are used as extension cords to provide suitable connections between sensors, jack panels, or instrumentation.

**ORDER CODES**

**Example Order Number:**

JE6, CC - F1B036 - 4, CC

### 1. Terminations and Options

[1] Insert 3 digit "B" length in inches. EX: F1036=36" B" length; for assemblies requiring other than the standard 6" C" dimension, insert 3 digit "C" length in inches after "B" dimension. EX: F1A036-012=36" B" length with additional 12" C" length. For PVC-coated or FEP coated flex, substitute suffix code A with P for PVC and T for FEP coating. Example: F3P is stranded fiberglass leads with PVC flex.
